GENERAL STATEMENT

The Tribal Water Engineer is a position created pursuant to the “1990 Fort Hall Indian Water Rights Agreement” (Water Rights Agreement) and by the “2007 Shoshone-Bannock Water Resources Code” (Water Code), for the administration of all Tribal Water Rights, on the Fort Hall Reservation, including compliance with all applicable law and regulations. The regulation of reservation water being the lifeblood of the community and critical to the conservation and enhancement of its resources, the Tribal Water Engineer shall equitably guard all the interests involved in carrying out the duties and authorities of his/her office.

SUPERVISION

This position is under the direct supervision and evaluated by the Executive Director and receives policy direction from the Tribal Water Resources Commission (TWRC) in compliance with the Water Rights Agreement, Water Code, and regulations. This position supervises and evaluates Tribal Water Resources Departmental personnel as specified in position descriptions.

DUTIES AND RESPONSIBILITIES

WATER ADMINISTRATION: Administers water rights to ensure maximum compliance with Water Code and all permits, determinations, orders, regulations, methods of diversion, withdrawal, and other activities

Tribal Water Engineer

Approved 7/12/22 DA3296

affecting water quality and quantity. Installs measuring devices for the purposes of enforcing and administering the Water Code, and monitor water use, water quality and diversions. Declares “surplus” and “drought” water supply conditions, and prepares alternative scenarios for water supply given different climatic trends and conditions for use in setting priorities and preferred uses during drought. Confers with farmers, officials of irrigation districts, representatives of federal, state, and local governments to discuss matters such as water delivery schedules, water delivery conflicts, construction problems and diversion of water. In emergency situations, remove, render inoperative, shut down, close, seal cap, modify or remove, or otherwise control methods of diversion and withdrawal, obstructions to the flow of water, and activities adversely affecting water quality and quantity. Initiates, by citation and other means, enforcement proceedings for violations of the Water Code, before the TWRC or court of competent jurisdiction.

OFFICE OF THE TRIBAL WATER ENGINEER: Employs and supervises office and technical staff who are employed to enforce and administer the Water Code, in accordance with Tribal policy. Develops and recommends office and capital project budgets, policy and procedures to the Fort Hall Business Council (FHBC) for approval. Conducts public educational programs regarding reservation water rights and administration, irrigation management, water quality, environmental issues and water conservation. Develops the internal tribal technical and managerial capabilities to promote the direct involvement of tribal staff in the development and construction of water resource supply, distribution, and management facilities and devices. May also act as a point of contact for federal agencies.

ADVISORY FUNCTIONS: Advises the Tribal Water Resources Commission on all water resource related development planning issues and provides the TWRC and FHBC with a semi-annual report on water quality and quantity and the status of water use on the Reservation. Provide suggestions, alternative and recommendations for water quality management. Recommends in coordination with other agencies and departments, designations of land areas, water as suitable for decision to beneficial uses. Recommends designation of surface and ground water regions as “critical management areas” and to propose specialized provisions for management within such regions. Assists applicants for permit or license in assembling and analyzing all hydrologic and environmental data required to be submitted with the application and otherwise assists in the preparation of the application, and if appropriate, seek assistance from other tribal departments. Develops tribal ordinances, codes, regulations, standards, of revisions thereto for the protection of surface water and or ground water sources on the Reservation with final recommendations to the TWRC and/or FHBC. Provides recommendations for resolution of conflicts between the Tribal and federal laws related to tribal water rights and its uses. Reviews and reports on dam safety studies.

RESEARCH FUNCTIONS: Conducts hydrologic investigations to determine water supply and quality characteristics, analyze existing uses, identify water needs and development possibilities. Collects, maintains, and analyzes, on a continuing basis, information regarding reservation-wide water resources and quality. Organizes and develops computerized data of reservation water resource information. Develops data regarding the overall carrying capacity of the Reservation’s water system. Determines the extent of potential effects on existing water users from proposed uses of reservation water. Identifies new or analyze existing uses and means of developing, managing, water resources and solicits research proposals by government, university, or private sources. Conducts hydrologic investigations to determine water needs. Identifies sources of financial support for water management and development. Coordinates and recommends joint and separate studies and with tribal departments; meeting at least monthly to prevent duplication of services. Identifies and seeks a variety of funding sources for development of infrastructure for the protection of tribal surface water and ground water sources, and will coordinate such efforts with other applicable tribal departments. Oversees and manages contracts and projects for

individual sanitation facilities within the Fort Hall Reservation in coordination with federal agencies and tribal departments.

TRIBAL MANAGEMENT SYSTEM COMPLIANCE: Interfaces with grant agencies and Tribal Management System personnel to ensure programs and departments are managed in compliance with applicable regulations and the Tribal Management System policies and operating procedures governing: Personnel, Finance, Contracting, Administration, Records, Facilities, Information Technology, and Property Management. Shall take corrective action for fiscal accountability, contracting matters, personnel issues, or other Tribal Management System administrative problems as identified.

OTHER DUTIES AS ASSIGNED: Duties and responsibilities shall include other related activities as needed to carry out the position functions.

CONFIDENTIALITY: MUST MAINTAIN STRICT CONFIDENTIALITY OF ALL INFORMATION, INCLUDING RECORDS, REPORTS, DOCUMENTS, CONVERSATIONS, ETC. A breach of confidentiality will be subject to appropriate disciplinary action, up to and including dismissal from employment.

PERFORMANCE STANDARDS AND COMPETENCIES INCLUDE, BUT ARE NOT LIMITED TO:

- Quality of supervision, scheduling and coordination of personnel functions.
- Ability to communicate clearly and concisely, both orally and in writing,
- Establishes and maintains effective working relationships with job contacts.
- Quality of program planning and evaluation.
- Compliance with Tribal Management Systems.
- General Management: leadership, problem solving, interpersonal relations, fiscal management, human resource management and team building.
- Must be able to adapt quickly to change(s) a self-starter and be able to work with little or no supervision.
- Responsible for modeling high standards of honesty and integrity in all matters relating to employment with the Shoshone-Bannock Tribes; and, are required as condition of employment to conduct them self both on and off the job in a manner that brings credit to the Tribal government.
- Motivates department personnel and peers toward future goals. Monitors and evaluates program performance and accomplishments; assesses overall effectiveness and efficiency and provides appropriate incentives, and guidance.
